

# Learn More about APSF

The Anesthesia Patient Safety Foundation (APSF) has sustained a vision for patient safety for its 36-year history **“that no one shall be harmed by anesthesia care.”** Since its founding in 1985, the APSF has advocated for improvements in anesthesia care and patient safety that have dramatically contributed to reductions in patient harm. The APSF has three primary missions:

**Identifying safety initiatives**  
and creating recommendations  
to implement

**Being a leading voice**  
for anesthesia patient  
safety worldwide

**Supporting and advancing**  
anesthesia patient safety  
culture, knowledge, & learning

## Patient Safety Priorities

Culture  
of Safety

Teamwork

Clinical  
Deterioration

Non-Operating  
Room Anesthesia

Perioperative  
Brain Health

Opioid-related  
Harm

Medication  
Safety

Infectious  
Diseases

Clinician  
Safety

Airway  
Management

# APSF Patient Safety Activities

The APSF has provided 130 anesthesiologists **more than \$13.5 million** in funding for anesthesia patient safety research. Examples of the success associated with APSF-supported research include: Hypothermia, Perioperative Vision Loss, Simulation, and Residual Neuromuscular Blockade.

Our translation of the *APSF Newsletter* into five languages has dramatically increased readership. In 2020 the *APSF Newsletter* and the APSF website had over **2 million page views** from all 230 of the world's countries. Arabic and Russian translations will be added in 2022.

Over **\$13.5 million**  
in research grants awarded

**20** APSF Consensus  
Conferences  
conducted to date  
(no registration fees)

➤ **apsf.org**  
**over 1 million**  
visitors per year
